

PROJECT DESIGN PHASE -I

SOLUTION ARCHITECTURE

Date	14 October 2022
Team ID	PNT2022TMID33421
Project Name	Personal Expense Tracker Application
Maximum Marks	2 Marks

SOLUTION ARCHITECTURE:

People in order to track their expenses use traditional paper system to keep the record of their income and expenditures. This type of traditional system is burdensome and takes more time. Its goals are :

- Personal Expense Tracker is a technology driven approach where user have to log in to track their spending and earnings.
- Upon using this application user are provided with three options for data entry namely – Income, Expense and wish list.
- Personal Expense Tracker (PET) lets you have your privacy, you must login to open this application
